**Susan Brower, Minnesota State Demographer**

**November 2015**

# Big

## Demographic Trends

- **Aging, aging, aging**
- Increasing **diversity**—  
ethnicity, language,  
religion, etc.
- **Labor force** growth
- **Population** growth  
since the recession

**Trend 1**  
**Population Aging**

# How many additional “older adults” will Minnesota gain during this decade?

Change in older adults, age 65+ (in thousands)

Source: U.S. Census Bureau

# Unprecedented increases in MN's “older adult” population

# What Minnesota looks like... this year

Population by age and sex  
Minnesota, 2015

# Budget pressures will change

## More 65+ than school-age by 2020

# Changing demand for public services

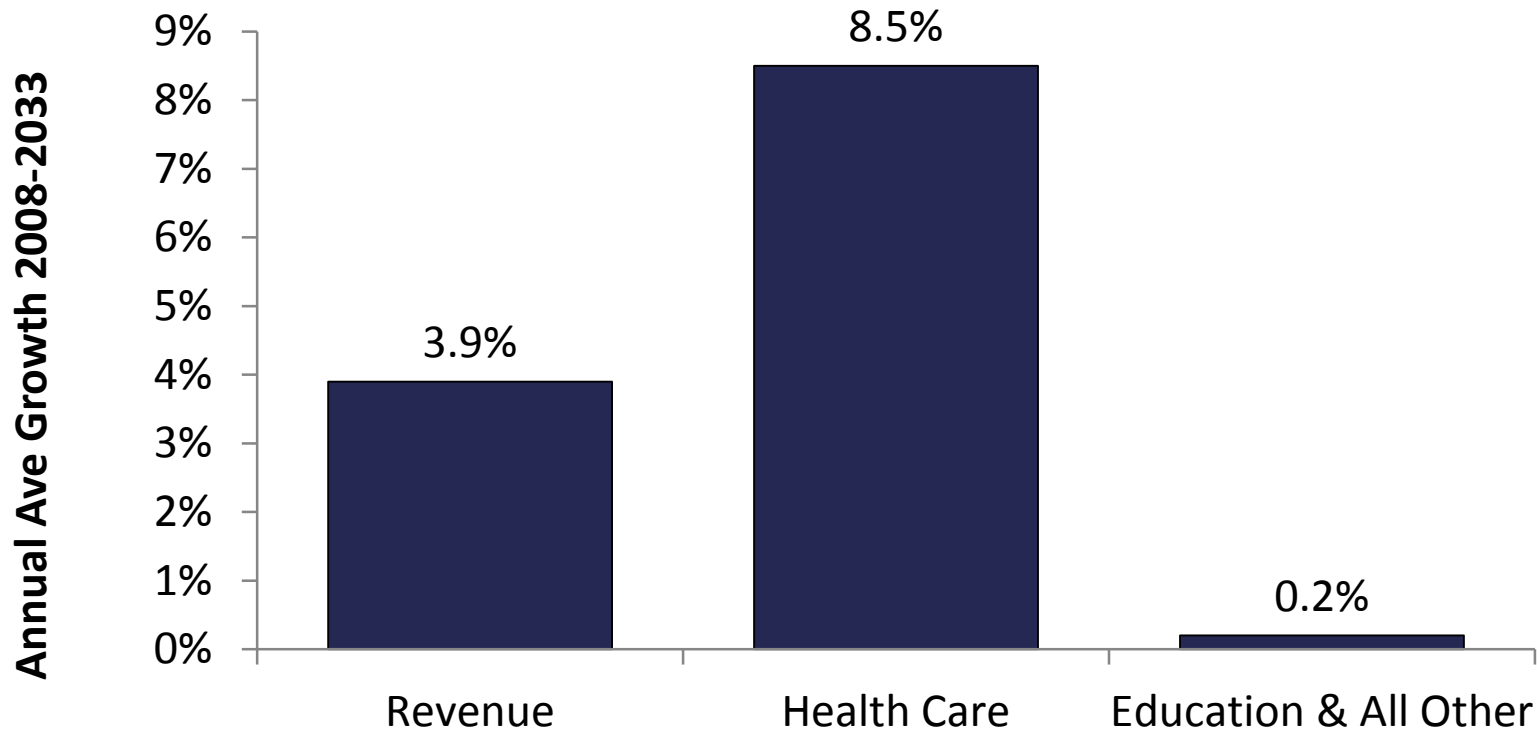

## General Fund Expenditures

## Within Health & Human Services

- Medical Assistance Expenditures: 25% of GF spending (8.5 billion)
- Medical Assistance Expenditures for the Elderly and Disabled: 16% of GF spending (5.5 billion)
- MA expenditures include basic care, long-term care waivers and long-term institutional care

# If state health care costs continue unabated, other services crowded out (projected through 2033)

Source: General Fund Spending Outlook, presentation to the Budget Trends Commission, August 2008, Dybdal, Reitan and Broat.

**Trend 2**  
**Increasing**  
**Diversity**

# 50 years of growing diversity in our region, state, nation

## Percent Of Color, 1960-2010

# Black, Latino and Asian populations growing rapidly

Populations of color, MN

# What does a slower growing labor force mean to MN?

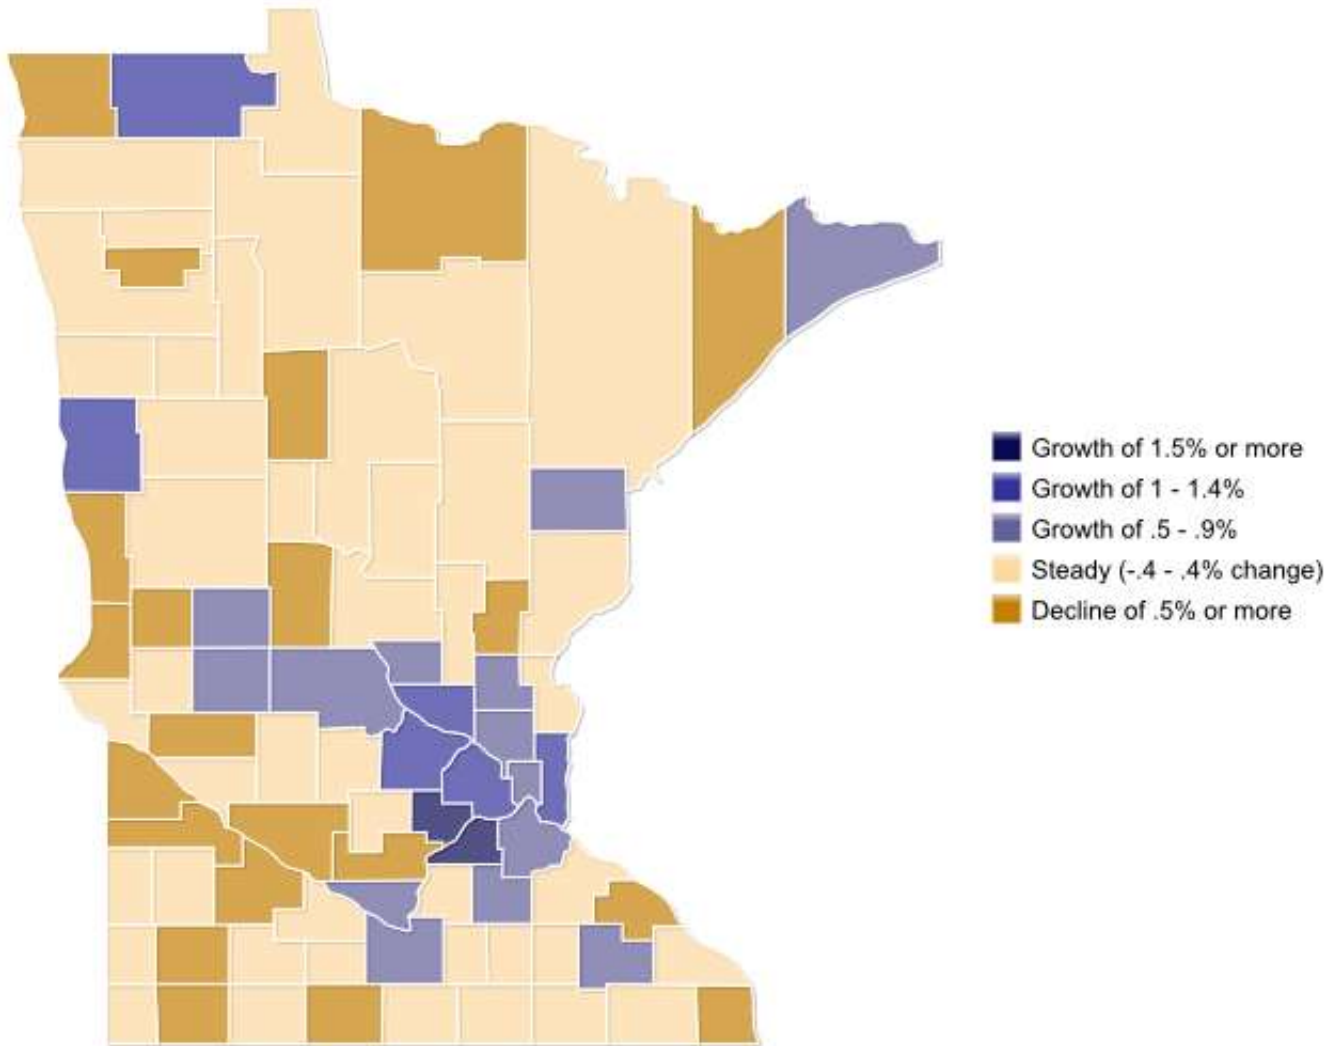

- Dampened economic growth?
- No room to leave any potential worker behind (e.g. People of color, older workers, parents, people with disabilities)
- Premium put on educated, highly-skilled talent
- Employers who find and retain workers in new and creative ways win

**A look forward:  
projected growth**

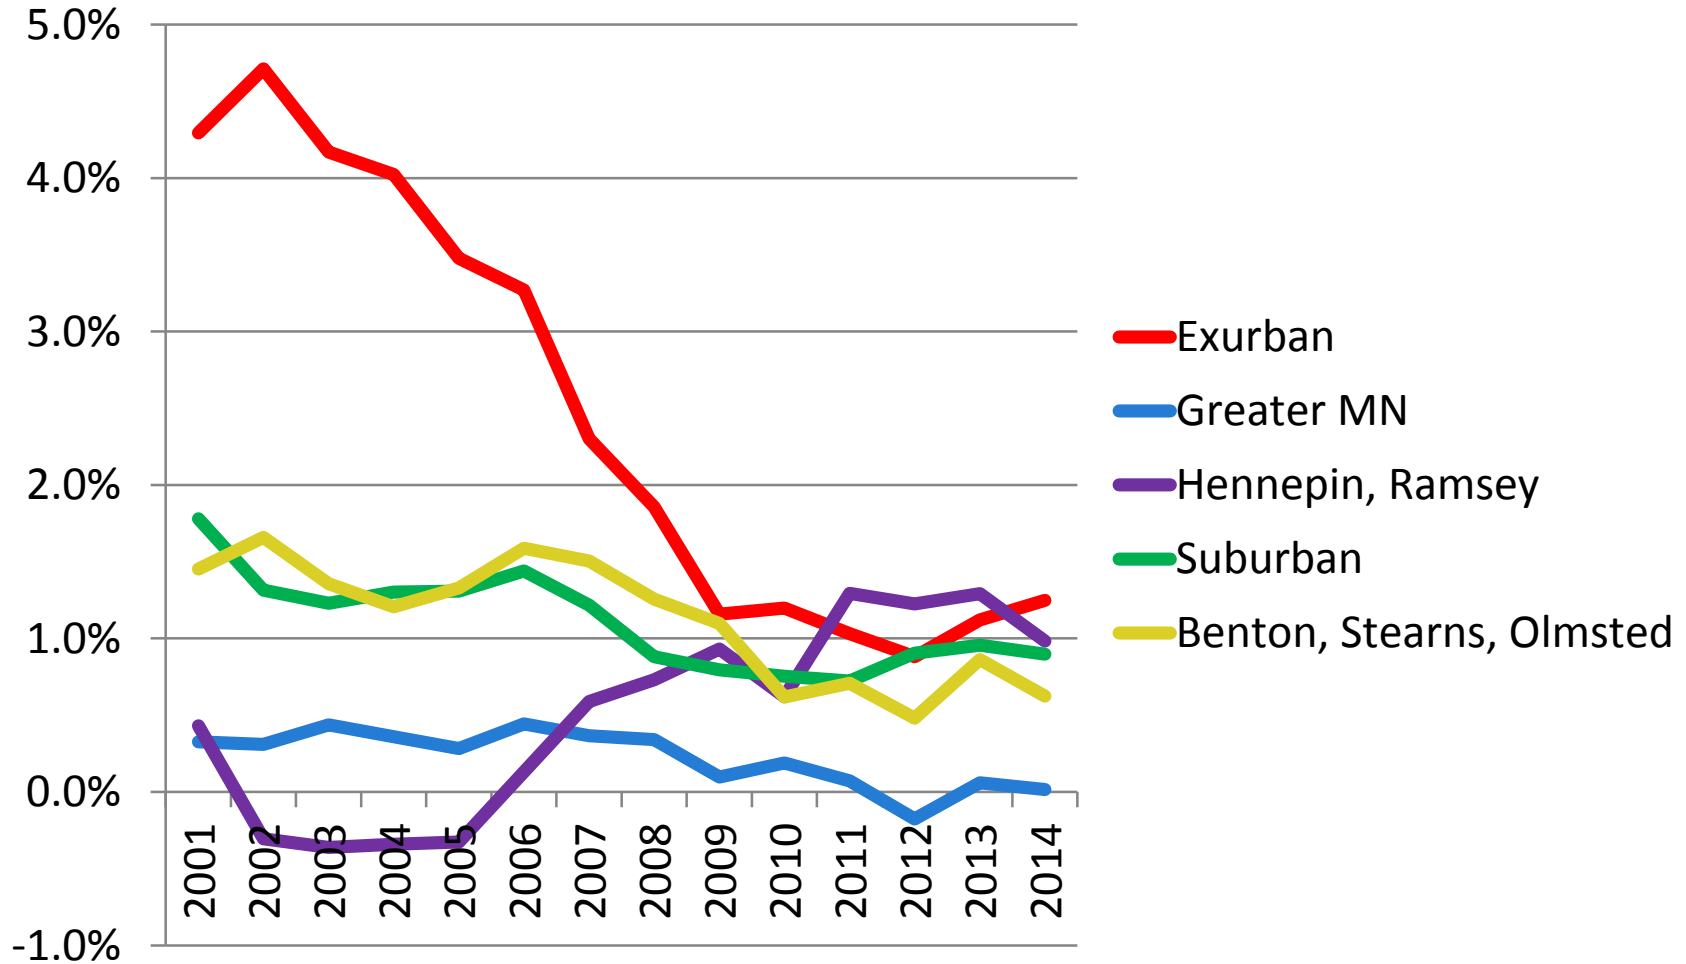

# Population change

By county, 2013-2014

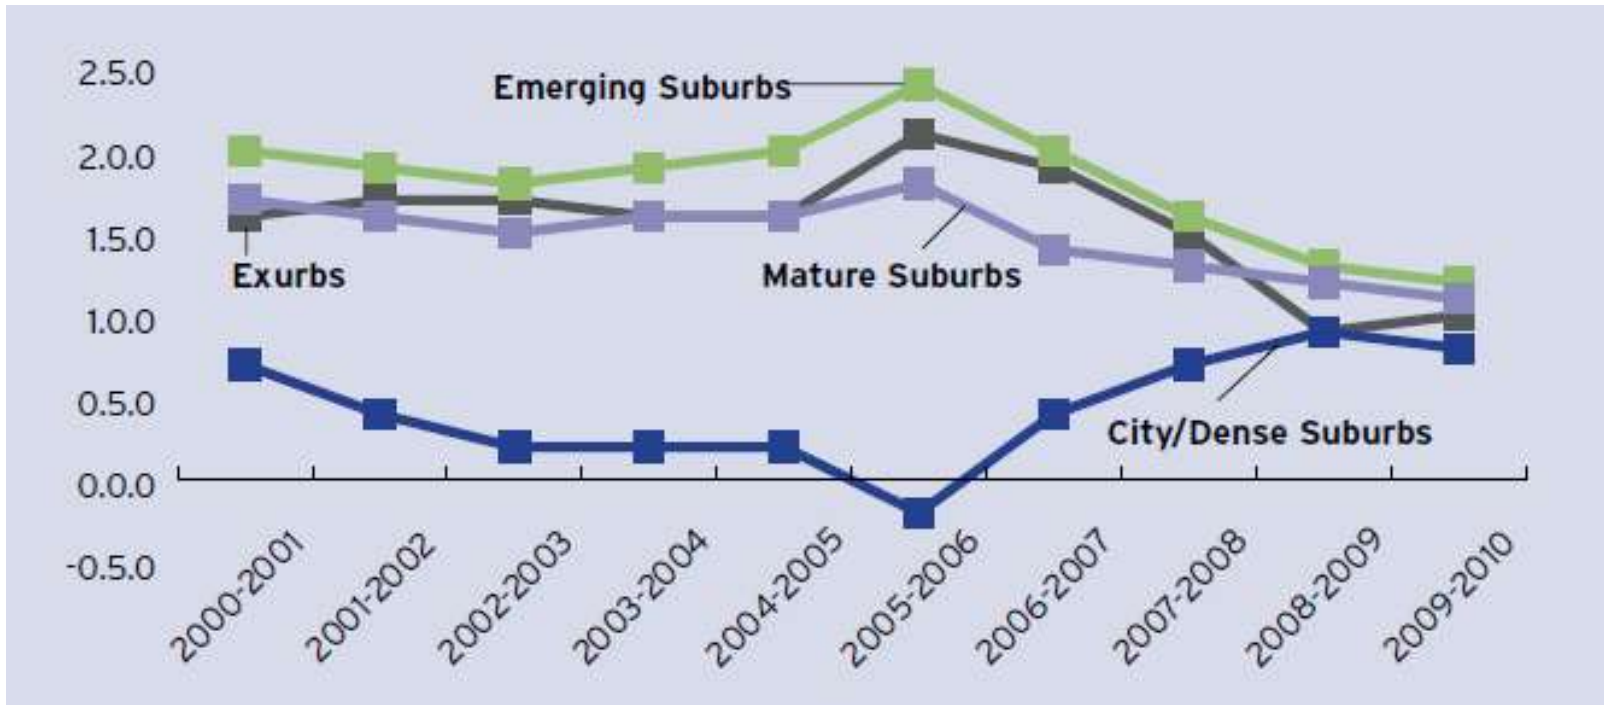

# Growth rates in Minnesota have converged

# Growth rates in Minnesota have converged

# Growth rates are converging nationally too

Source: Brookings Institution

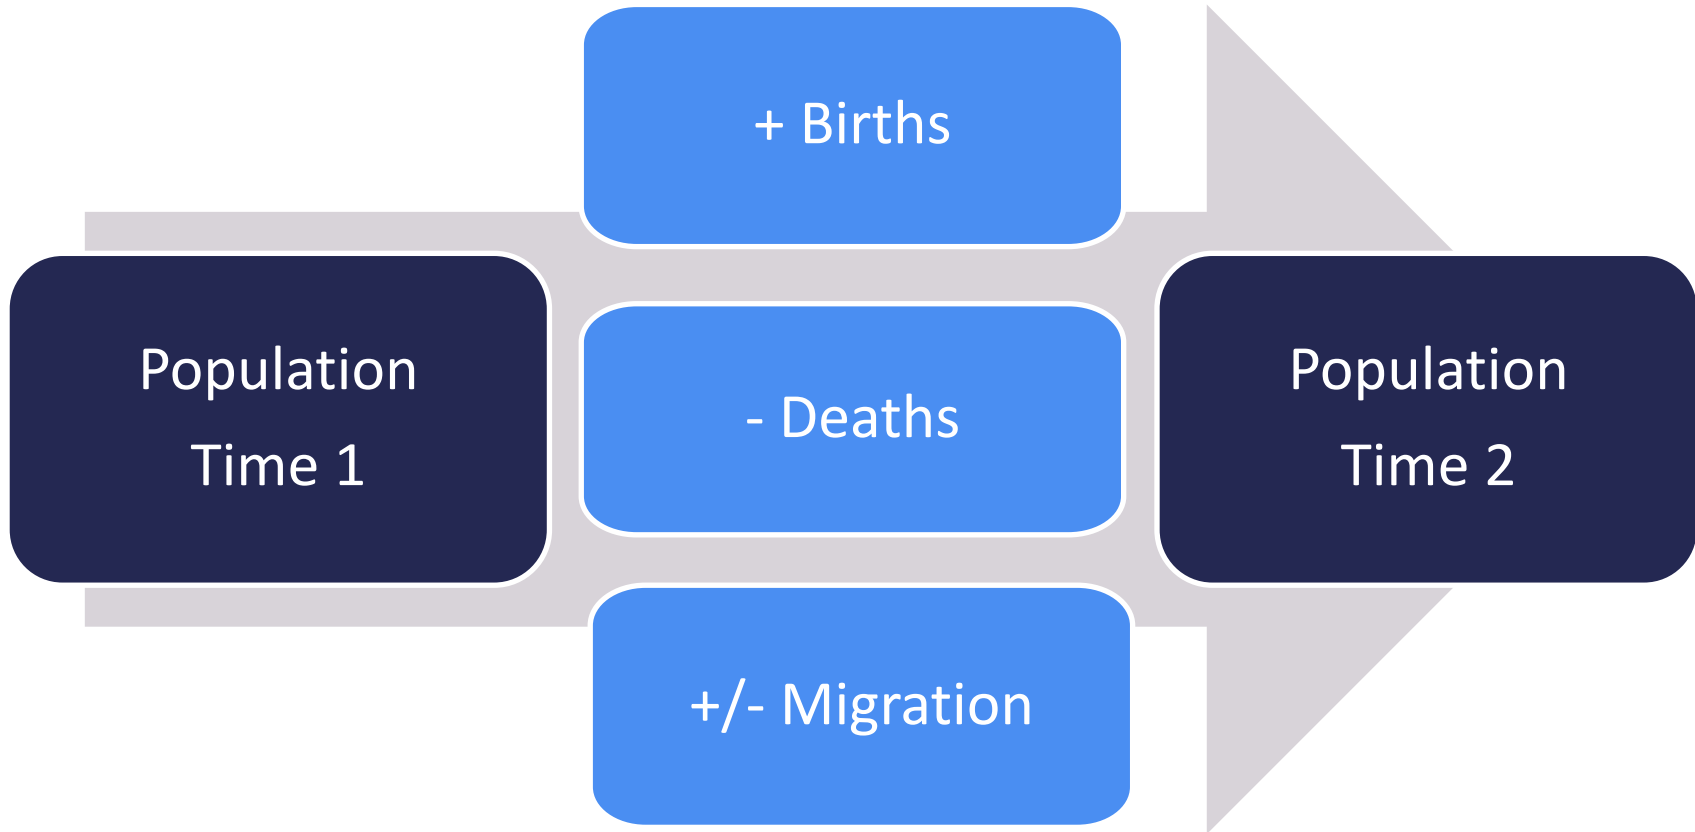

# State Demographer's and Met Council's projections for the region differ

Difference of about 300,000 people by 2040; ~12,000 year between now and then

Met Council (2012) Met Council (2015) State Demographic Center (2014)

# All population changes operates through 3 components

# Cohort-component method

## Strengths

- Relies on age structure & stable “behaviors” (births, deaths and migration)
- Assumptions are transparent, can be evaluated relative to historical data
- Suitable for both urban and rural areas
- Does not incorporate expected social and economic change directly

## Weaknesses

- Does not predict social and economic changes
- Not universally appropriate for small areas where migration may be variable

# State Demographic Center, Projected Components of Change

# Met council projects increase in births in the 2015-2020 period

Source: State Demographic Center and Met Council, REMI outputs

# We do not expect to see a near-term return to pre-recession fertility levels

**Minnesota's Total Fertility Rate  
(per woman of child-bearing age)**

# Demographic change will shape the future...but not completely determine it

- These data are sobering **IF** we continue to adhere to the policies and institutional arrangements that we have built for our demographic past.
- Things are going to change whether or not we're ready for them; there's no reason we can't create something that's really great
